

Haskell Expands Process Services with Strategic Ownership

For Immediate Release

Jacksonville, FL., May 4, 2009 – Haskell has expanded its process services capabilities through ownership in PTS Engineering, an Atlanta, Georgia-based process engineering firm specializing in the food and beverage industries.

The combination of Haskell and PTS will provide clients with over 200 years of practical hands on building, process and packaging experience.

John-Paul Saenz, Haskell vice president and food/beverage division leader, describes ownership in PTS Engineering as a "strategic fit." "PTS Engineering expands Haskell's turnkey capabilities with their unique process and packaging expertise".

"We are excited to become a part of Haskell. Together, we can provide cost effective solutions to the most challenging building, process and or packaging issues our clients face" said Paul Clark, president of PTS Engineering.

According to Phil Ackley, director of Haskell Process Services, "Haskell and PTS share a common culture that focuses on the client; mitigating their risks, reducing program costs and enhancing their operational efficiency."

Haskell and PTS Engineering provide turnkey facility solutions throughout the US, Asia, Latin America, and the Caribbean. Additional areas of expertise include production related energy and water conservation solutions.

About Haskell

Haskell is one of America's leading integrated design and construction firms with a dedicated team focused on the food and beverage industry. Ranked # 1 Green Manufacturing & Industrial Contractor in 2008 by ENR Magazine. The company has annual revenues of more than \$718 million with offices in the United States and Mexico.
